

I am disgusted, absolutely disgusted.

Sinclair Broadcasting profits from the use of our public airways and pays nothing. The only request their country has ever made of them is to serve the public interest.

By forcing, FORCING, their affiliates to show an anti-Kerry documentary that amounts to little more than an extended Swift-Boat ad they are serving their own political and financial agenda, not the public and not me.

Where are you? Is a 2 second shot of a woman's nudity your only concern? When you see such obvious propaganda being shoved down our throats, don't you feel obligated to do something... anything?

The monopolization of our media is destroying the free press. A few powerful individuals running massive organizations now control a large portion if not the majority of our news sources and twist them to suit their interests. Anyone remember yellow journalism and Hearst?

America's news coverage is a joke: no international news, reporters reciting sound bites rather than investigating, and little or no local coverage. Corporations concerned only with a quick buck have turned our press into a sad mix of sensationalism and whitewash. And in the end they blame it on the American people saying we want it "dumbed down".

If that were true, then why do I, and so many others turn to alternative print media, international news sources, and the Internet to educate ourselves about the world and our own country?

I was born an American, and like many Americans I've taken my freedom and my rights for granted, but no more, I've had enough.

Please, don't let me fight alone. Stop Sinclair. Stop the destruction of the free press. Start serving the American people.

Thank you.
